### DETAILED ACTION

1. Claims 1-4 and 9 are presented for examination.
2. Claims 5-8 are withdrawn.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Barker et al. (6,363,421) (hereinafter Barker).
5. As per claim 1, Barker clearly shows in a telecommunications network of network elements and management systems for managing the network elements, a managed network element comprising: a CORBA SERVER (e.g. col. 8, lines 59-64); plural CORBA-based managed objects accessible by the CORBA-based server (e.g. col. 4, lines 27-36); and a CORBA-based applications programming interface coupled to the CORBA-based server (e.g. col. 7, lines 46-56).
6. As per claim 2, Barker clearly shows Barker clearly shows the managed network element wherein the CORBA-based API is coupled to an external operations support

Art Unit: 2154

system for managing the plural CORBA-based managed objects therefrom (e.g. col. 7, lines 39-63).

7. As per claim 3, Barker clearly shows the managed network element further comprising a management protocol agent as a CORBA-based client of the CORBA-based server, the management protocol agent coupled to an external element management system for managing the plural CORBA-based managed objects therefrom (e.g. col. 4, lines 37-55).

8. As per claim 4, Barker clearly shows the managed network element wherein the management protocol agent is an SNMP agent (e.g. col. 5 and 6, cols. 65-67 and 1-8 respectively).

### ***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Barker in view of Liem et al. (5,960,342) (hereinafter Liem).

11. As per claim 9, Barker teaches the managed network element further comprising an embedded operations channel agent as a CORBA-based client of the CORBA-based server and wherein the plural CORBA-based client of the CORBA-based server (e.g. col. 8, lines 54-67), but does not teach wherein the plural CORBA-based managed

Art Unit: 2154

objects includes GR-303 managed objects, the embedded operations channel agent coupled to an external local digital switch for managing the GR-303 managed objects therefrom. Liem teaches wherein the plural CORBA-based managed objects includes GR-303 managed objects, the embedded operations channel agent coupled to an external local digital switch for managing the GR-303 managed objects therefrom (e.g. col. 2, lines 41-57). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine Barker with Liem. The motivation would have been to manage GR-303 interface.

12. Applicant's remarks, filed 1/02/04, are moot in view of the new grounds of rejection necessitated by Applicants amendment.

### ***Conclusion***

13. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
